Four things to know before you pick a product.

01 **Business problem definition**

If you can't articulate it, you can't design intelligence for it.

02 **Data & infrastructure**

Poor data is the biggest constraint on AI success.

03 **Governance & ethics**

Can you oversee, explain, and validate the logic?

04 **Ownership strategy**

Build · Buy · Borrow · Bot — each has a different ROI curve.
